SHUBHAM DHAPOLA

Full Stack Developer (MERN)
Indore, Madhya Pradesh, India | shubhamxdhapola@gmail.com | +91 9322663609
GitHub · Portfolio · LeetCode · LinkedIn

SUMMARY

Full Stack Developer (MERN) with hands-on experience across frontend, backend, and database layers — React, Node.js, Express, MongoDB, TypeScript, and Next.js. Skilled in building secure REST APIs (JWT auth), responsive UIs (React, Tailwind CSS), and working with SQL and NoSQL databases. Open to Full Stack, Backend, Frontend, and Software Developer roles.

EDUCATION

SAGE University, Indore — Master of Computer Applications (Computer Science)
2025 – 2027 | CGPA: 8.67

Shri Shankaracharya Professional University, Bhilai — Bachelor of Computer Applications (Computer Science)
2022 – 2025 | CGPA: 8.45

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, Java, C, C++

Frameworks / Libraries: React, Node.js, Express, Redux, Mongoose, Tailwind CSS, Bootstrap

Databases: MongoDB, SQL

Tools / Platforms: Git, GitHub, Postman, Firebase, Vercel, HTML5, CSS3

Core Competencies: Full Stack Development, RESTful API Design, Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Design, Authentication & Authorization, Responsive Web Design, Version Control (Git), Software Development Life Cycle (SDLC)

PROJECTS

Octane - Fuel Station Management Platform — Link Node.js · React · Express · MongoDB · Redux · Tailwind CSS · Gemini

- Automated shift, meter, machine, nozzle, tank, and fuel-price management by building an AI-powered petrol pump management system on the MERN stack
- Secured REST API endpoints against unauthorized access using JWT authentication and MongoDB transaction handling to prevent data inconsistency
- Surfaced fuel consumption and sales trends by integrating the Gemini API for AI-powered analytics, enabling data-driven pricing decisions

BarbaeQ - Salon Queue Management SaaS — Link React · Redux · Node.js · Express · MongoDB · Cloudinary

- Built a multi-tenant, real-time salon and barber shop queue management platform (MERN) supporting four role-based dashboards: Customer, Barber, Shop Owner, and Super Admin
- Engineered live queue tracking and dynamic ETA calculations using Socket.io for real-time position updates, barber delay buffers, and instant status synchronization
- Implemented secure JWT authentication with HTTP-only cookies, bcrypt password hashing, and role-based access control (RBAC), plus a Recharts analytics dashboard and Zod-validated REST APIs

BitLinks - URL Shortener — Link Next.js · MongoDB · Tailwind CSS

- Built a full-stack URL shortener with Next.js App Router and a responsive Tailwind CSS interface
- Eliminated broken and duplicate link errors by implementing robust validation and edge-case handling across API routes
- Used MongoDB and Mongoose to efficiently store and manage original and shortened URLs, including creation, redirection, and duplicate checks

CERTIFICATIONS

- Software Engineering Job Simulation — Accenture
- Career Essentials in Software Development — Microsoft
- Frontend Developer (React) — HackerRank

HONORS & AWARDS

- Star Performer of the Month (October 2025), Sunstone at SAGE University Indore — recognized for outstanding academic performance among MCA 1st Semester students
- Commended for leadership and fostering technical excellence as Tech Club Coordinator
- Solved 350+ questions on LeetCode and HackerRank, strengthening core Data Structures & Algorithms proficiency
